TO OPEN UP SUNDAY

Another Graceful Bridge Added to Wichita's Many.

DRIVE IS NOW COMPLETE

Griswold, Riverside and Grif- Mrs. King fenstein All Connected.

Sunday there will be opened in Wichita the prettiest park bridge in the west. This perfectly well. I can honestly say that is the bridge between old Griswold park and old Riverside.

This bridge connects all the parks for the first time in the history of the city and completes the longest and most beautiful drive in the west without a single exception. St. Louis has nothing to exceed it in beauty and Kansas City and Denver

nothing to equal it. For years the great bend of the river on the west side of Little river at Oak street was inaccessible except by the "Smith Ford," which was located right back of the Woodman place, and led up to was known to all the Wichita boys at one time as Kay Smith's house-a good place for truents, because it was across the river and out of sight.

Oak Street bridge was built, connecting the town with the park. Not until Mayor Ross took up the park idea and developed it was Greiffenstein's park connected with

isolated. One driving in Riverside had to make a long drive to gain Griswold's. But the new bridge, graceful and en-ticing to strollers, completes the systems of parks, in fact unites them into one. If the day, he fair Sunday, large crowds will no doubt go over and participate in a sort of a bridge warming
